

Community Policy

Horner Brothers aims to have a positive impact across the community in which we operate. We believe that our business performance, profitability and reputation will be enhanced by working with our local community.

We recognise the impact of our activities and aim to:

- Be a responsible neighbour by understanding the local environment
- Proactively manage our Environmental Health & Safety impacts including measuring E, H&S inputs and outputs for all our sites
- Provide employment opportunities for local people including training and development

We are committed to local involvement with community projects, forming long-term relationships with educational establishments, institutions and the local authority. We are recognised as an Investor in Education, members of Rotherham Chamber of Commerce, BPIF and Print Yorkshire and support Business and Education South Yorkshire.

We will continue to provide pro-active support such as work experience opportunities and school and college visits. We are committed and enthusiastic about being involved with industry challenges such as the Shell Training and Enterprise Programme (STEP) and enterprise days held at local schools. Our employees are encouraged to participate and thereby develop and enhance their own skills.

Networking and sharing best practice and new ideas with businesses both within and outside our own industry is an important area. We have delivered seminars on environmental issues and training and development initiatives to share examples of our best practice with others.

We aim to engage employees to raise funds for local charities such as the Rotherham Hospice and Help a Hallam Child and encourage participation in national charity days such as 'Wear it Pink', 'Genes for Jeans' and 'Comic Relief'.

Judith Fox
Managing Director
